

THE RIVER DRAGON NV

If the sky could dream, would it dream of dragons?

Dragons exist in the realm of magic, but their origins are grounded by our collective fascination and curiosity in nature. Perhaps inspired by dinosaurs, there is a rich and ancient history of dragons throughout the world. Draco Africanus, the majestic African Dragon, is alleged to have spent its time whimsically flying and “skywriting” with smoke. Benevolent, wise and powerful, the ‘River Dragon’ of Silverthorn appears eternally silhouetted against the River Without End Mountains.

WINEMAKING

River Dragon was hand harvested towards the end of February in the early hours of the morning at 19 degrees balling. The grapes from a vineyard planted in 1983, were whole bunch pressed with a very low recovery rate of only 500 litres per ton – this ensures that no bitter tannins are extracted. 40% of the base wine was fermented in old Acacia 500 litre barrels to enhance complexity. Secondary fermentation occurred in the bottle and the wine spent a minimum of 12 months on the lees after which it was manually riddled and disgorged.
